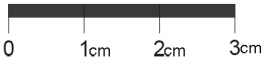
FIND YOUR RING SIZE

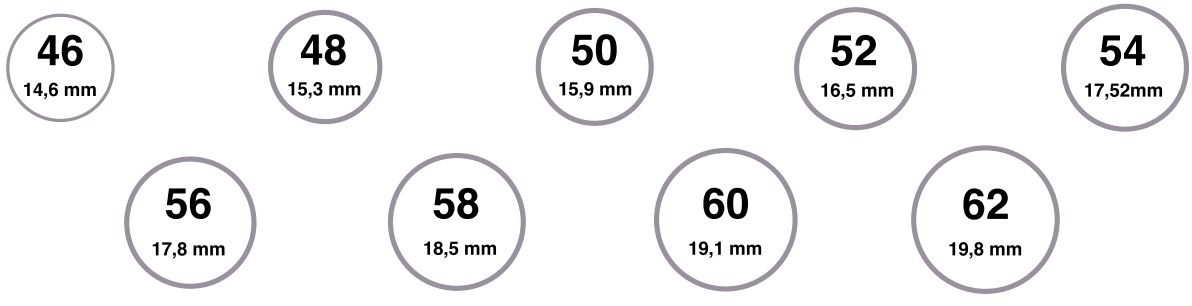
Please, take a print out of this page, if you have a chance.
Please, make sure that the page measurement is 100% in the Print Overview before taking a print out of this document.

Measurement:



Take a ring that you already have been wearing
(use a ring that is similar to the ring you would like to purchase), and place it on the circles below (Make sure that you place the inner circle of your ring on the circles).The circle that fits perfectly to the inner circle of your ring indicates your ring size. If the inner circle of your ring falls between two of the circles below, we suggest that you choose the higher value for your KURSHUNI ring size.

If your credit card fits here perfectly, you can use your print out to find your ring size.



*Mm values in this section indicates the value of your ring's Inner Diameter.

In the case that you are not able to take a print out,

Take a ring that you already have been wearing. (Use a ring that is similar to the ring you would like to purchase.) Measure the inner diameter of the ring with a ruler that has a Millimeter (mm) measurement. (Please, make sure that you measure the largest part of the ring when doing this procedure.) Note the millimeter measurement from the ruler. This value (mm) is equivalent to the Inner Diameter value from the table below.

Or

Take a rope or a strip paper to measure the finger that you would like to wear a ring. Wrap the rope/strip paper to your finger and mark the part where both sides are touched to each other. Find a ruler that has a Millimeter measurement, and measure the space on the rope that you marked. This value will give the length of the circumference of your finger.This value (mm) is equivalent to the Inner Circumference value from the table below.

If the value that you found falls in between two values in the table below, we suggest that you select the one with the higher value. If you are wearing more than one ring in one finger (Most of KURSHUNI rings are specially designed for combinations to have multiple rings on one finger), we suggest that you order your rings one size higher than your ring regular size.

CONVERSION CHART FOR RING SIZES

KURSHUNI SIZE	Inside diameter		Inside circumference		Sizes			
	(in)	(mm)	(in)	(mm)	USA Canada	UK Ireland Australia New Zealand	India China Japan South America	Italy Spain Netherlands Switzerland
46	0,58	14,7	1,8	46,1	3¾	G½	6	6
48	0,60	15,3	1,9	48,0	4½	I	8	8
50	0,63	15,9	2,0	50,0	5¼	K		10
52	0,65	16,5	2,0	51,9	6	L½	11	11,75
54	0,67	17,1	2,1	53,8	6¾	N		13,75
56	0,71	17,9	2,2	56,3	7¾	P		16,25
